**BRADFORD GIRLS'
GRAMMAR SCHOOL**

Co-educational up to 11, Girls only 11-16

Dear Year 11 Students

Welcome back!

I hope you have had a relaxing holiday and are looking forward to the remainder of the school year.

During the holidays, the examination boards have provided us with more information about expectations relating to summer assessments. I have [attached](#) a document which summarises the key changes for this year that you may find helpful.

Teachers will use a range of evidence to inform a decision about a holistic grade for each subject. This may include evidence you have already completed, or assessments you will complete over coming weeks. Internal and external moderation processes, as well as examination board guidance and support, will make sure that teachers' grades are fair and reflect your current performance.

To help you prepare for assessments, teachers have put together a **timetable** which is attached to this letter.

Most of these assessments will take place in normal lesson time, and your teacher will tell you when this will be. It is important that your work is **entirely your own** and so they will be conducted in **silence**. If there are two option classes for a subject (History, Geography, RS and Business) some of your assessments will take place in the hall during PE and PSHE time. This is to ensure that some assessments are taken by students in both classes at the same time, but you may also take additional assessments in your separate lessons.

Please note that you will only need to take the assessments for the subjects that you study! In Science, you will either take the separate science exams (Biology, Chemistry, Physics) or the Combined Science.

You will be given a sticker for your planner which has your name and candidate number on and a folder for each subject you study. All your assessments should be put in this subject folder, which will be kept by your teacher. For any assessments you complete this term, please just use your **candidate number** and do not write your name on the front sheet. This is to help ensure your work is marked fairly; as far as possible the teacher will not know who has completed the work until after moderation.

When school reopened in March, you were asked to talk to your teachers about any issues you had experienced that had prevented you from accessing or completing learning during lockdown. Your teachers will have taken this into account when planning the assessments and you will only be assessed on what you have been taught.

However, you may also be eligible for special consideration if you are adversely affected by circumstances **at the time of the assessment**. There are strict criteria for this that can be found [here](#).

Once your work has been moderated, your teacher will be able to share with you your mark for that assessment. However, **they are not permitted to give you any indication of an overall grade**, so please do not ask them to do so. Please be aware that persistent attempts to discuss this with staff may be considered as exam malpractice and could affect your final grade. Be assured that your final grade will also be moderated by the school and exam boards – it is not the decision of any one teacher or member of staff.

If you have any concerns about subject assessments then please speak to your teacher who can give you more information. If you have any other questions or concerns then please speak to Miss Whitehead or Mrs Howarth.

I wish you every success.

Yours sincerely

Mrs Martin
Principal
