Apprenticeship

If you

- like the idea of working and earning
- want to continue to gain qualifications at the same time
- still want the opportunity to progress to university using work-based learning.

Apprenticeship

But

- The application process can be quite challenging and you may have to apply for several vacancies.
- You often need grade 4+ in English & Maths.
- Most people starting apprenticeships are over 18.
- It is often 'who' you know not 'what' you know and you need to be very pro-active.

Apprenticeship

Applications

- Vacancies all year round but busier from March onwards.
- Bigger companies advertise earlier – from December e.g. Audi, British Gas.
- More information – www.gov.uk/apply-apprenticeship.

Important information

- Applying for post-16 is not like applying to a school. You must apply to each college/school separately.
- There is no catchment area.
- It's a competitive system! You will need to attend an interview.
- We will be asked for references – these include behaviour (exclusions), attendance for years 10 and 11 and relationships with peers and staff.

Important information continued

- All of these options have application processes with requirements and deadlines.
- All of these options need thorough research and a back-up plan!
- Apply to at least 3 places.
- Apprenticeships are unpredictable so apply for a place at college as well.
- Check all websites for the most up to date information on open days and applications, entry requirements etc.

Predicted grades

- Predicted grades will be available in the week after October half term. Staff will be guided by assessments taken in June 2022 and other assessments since the start of the year.
- Staff will review and amend the grades as necessary after your mocks in December and again following the second mock exam session (core subjects) at the end of April.
- Do not make up your predicted grade as we have to verify them with the college. If we have to change them, it will not reflect well on you.
